

# Hosted Exchange

Hosted Desktop UK Limited ("HDKUK") provides cloud computing services to small and medium sized businesses across the UK. Our cloud solutions provide businesses with IT reliability, flexibility, value for money and business continuity.

## What is Hosted Exchange?

Hosted Exchange provides you with anytime access to your emails and means you no longer have to endure the hassle and expense of maintaining an in-house Microsoft Exchange and/or other email server.

We store all your email, tasks, calendars and contacts at our secure data centre and make them available to you via the Internet. You can access your email at any time using Microsoft Outlook, webmail or any other mail enabled application on any Internet enabled device such as a PC, Mac, Linux, laptop, tablet or smartphone.

## Key Benefits

**Work from anywhere** – you can access your emails, tasks, calendars and contacts from anywhere at any time with an Internet enabled device and Internet connection.

**Reduction in IT costs** – no need to buy and maintain an expensive in-house Microsoft email server and freedom from software licensing.

**Business continuity** – high security data centres coupled with data backup and replication reduce the risk of you losing business critical data.

**Full Outlook functionality** – access to the full features when connected to Hosted Exchange.
