

Managed Business Grade Connectivity and Data

Keep your business connected with fully-managed Connectivity services. Provides the performance, availability, and security necessary for your voice, video, and cloud-based applications.

Today, businesses are expected to respond quickly, and effectively to any customer request.

Businesses need to ensure that they have a reliable connectivity infrastructure with the performance, availability, and security needed to accommodate the multitude of online tools necessary for them not only to enhance customer service, but to be operational.

For this they need highly available internet access, high levels of security to protect against cyber threats and visibility of application performance. All these requirements can be met with HDUK's Connectivity solutions, which offer access services and advanced data services to suit a wide range of business situations.

At a Glance

Enterprise grade connectivity services keep your business connected to the digital world with a connection that you can depend on for business critical applications, high-performance that can handle hundreds and even thousands of simultaneous uses, and secure enough for the threats of the modern digital landscape.

As a fully-managed connectivity service, you can leave the running of the service to us.

What are the benefits?

- ✓ **Reduced business risk:** high availability of services and applications, reliable network, resilient access options
- ✓ **Ease of operation:** centralised management with visibility of performance; rapid implementation of new requirements to support growing or changing business needs
- ✓ **Commercial options to suit business needs:** choice of contract term; wide variety of access types; deals with no upfront costs; adds and changes to access do not initiate a new contract term
- ✓ **Low and predictable costs:** all services provided for a simple per month price, with contracts available for 1-5 years; all contracts come with SLAs specifying performance
- ✓ **Assured network performance:** the core network delivers 'five nines' availability; customers with HDUK supplied routers benefit from end-to-end management with network-wide SLAs
- ✓ **Lower voice and data costs:** customers can save costs by subscribing to HDUK's voice services; QoS is applied to prioritise voice, not impacted by use of other non-real-time applications
- ✓ **Simplified vendor management:** just one service provider for all voice and data services, with any problems arising fixed quickly
- ✓ **Agility:** a software-defined WAN (SD-WAN) option is available for customers requiring the capability to make immediate traffic routing changes to improve application performance
